...how?

How to display custom message on status bar while user is editing?

EditString ctrl ctrl.Left...ht).HelpLine(cHelp) );

Tried Description, Tip, etc...none work. any1 knows how to do it?

Thanks.

There is no implicit logic that would move "Tip" or any other to statusbar when EditField has focus.

OTOH, it should be quite simple - overload ChildGotFocus/ChildLostFocus, read the help from focused widget and push it to status line.

Mirek

hi,

that worked, thanks.
