Subject: Can't return to Visual Layout Designer
Posted by morley on Tue, 17 Feb 2009 06:57:46 GMT

I know this has been asked before, but I can't seem to get the visual layout editor back. I have restarted Ultimate, but Ctrl-T does not tab me back to the visual editor. There is no prompt to use Ctrl-T under edit either. I am in the build mode, not debugging. I read that this happens in debugging but I am not debugging. I assume this means the program is running or at a break point with the debugger. I am not in this mode.

I am a novice but I used the progam all day without a problem. Tonight as I was trying to finish something up for work this happened.

I don't see anything wrong with the layout file. Please help.

Thanks.

Here is my layout file:

```
LAYOUT(SimBatchBuilderLayout, 524, 312)
 ITEM(Button, btnSelectR1File, SetLabel(t_("SelectR1File")).LeftPosZ(8, 84).TopPosZ(76, 20))
 ITEM(Button, btnSelectKnobFile, SetLabel(t_("SelectKnobFile")).HSizePosZ(8,
432).TopPosZ(132, 20))
 ITEM(EditString, KnobFileDisplay, LeftPosZ(96, 412).TopPosZ(132, 19))
 ITEM(Button, btnAssignKnobToR1/EPF, SetLabel(t_("AssignKnobToR1/EPF")).LeftPosZ(16,
108).TopPosZ(172, 16))
 ITEM(EditString, R1PathDisplay, LeftPosZ(96, 412).TopPosZ(76, 19))
 ITEM(RichTextView, richTxt1, LeftPosZ(8, 508).TopPosZ(204, 92))
 ITEM(EditString, EPFPathDisplay, LeftPosZ(96, 412).VCenterPosZ(19, -42))
 ITEM(Button, btnSelectEPFFile, SetLabel(t_("SelectEPFFile")).LeftPosZ(8, 84).TopPosZ(104,
20))
 ITEM(Button, btnSelectKnobDir, SetLabel(t_("SelectKnobDir")).LeftPosZ(8, 84).TopPosZ(20, 15))
 ITEM(EditString, KnobDirDisplay, LeftPosZ(96, 412).TopPosZ(16, 19))
 ITEM(Button, btnSelectTelemDir, SetLabel(t_("SelectTelemDir")).LeftPosZ(8, 84).TopPosZ(48,
16))
 ITEM(EditString, TelemDirDisplay, LeftPosZ(96, 412).TopPosZ(44, 19))
END_LAYOUT
```

 ITEM(Button, btnAssignKnobToR1/EPF,

Remove /EPF here.

Thanks it works now!

That was quick.

The "/" messes things up ?. Why is that ? Are there some characters to avoid?

I am going to bed now.

Thanks again!

The value you type in the name field must be a valid C++ identifier.

I have added some filters to these editfields to allow only correct characters there.
