hello all

Is there a way to put an Image in cell in ArrayCtrl ?! if then how ?

thanx in advance

You have to use a Display derived class. If you want to use one cell for multi purpose (text - image) you have to create a new Display else you may use one which exist. See Display for references.

The following code add images from a iml file.

```
ArrayCtrl arct;
// ...
arct.AddColumn("Text");
arct.AddColumn("Image").SetDisplay(ImageDisplay()); // set a custom display for Image column
for(int i = 0; i < Imgs::GetCount(); i++)
 arct.Add(Imgs::GetId(i), Imgs::Get(i));
```

P.S.: If you want images just for certain cells you may use
SetDisplay(cell, col, ImageDisplay()); in that way you have custom image for specified cell and others use StdDisplay (which display text).
