hello All

i want to ask about

- 1- If i can put an image for the Window Background and make it stretchable
- 2- If i can remove the title bar from a window

---

```
1-class ImageWindow : public TopWindow {
    Image img;
    Image cache;

    void SetCache() { if (IsNull(cache) || cache.GetSize() != GetSize()) cache = Rescale(GetSize(),
    GetSize()); }
public:
    virtual void Paint(Draw &w) { SetCache(); w.DrawImage(0, 0, cache); }
    void SetImage(const Image &i) { img = i; cache.Clear(); }
};
```

Untested, but should work. If you use a transparent image you'll need to draw a background. This may be quite slow though.

- 2- SetWindowLongPtr with GWL\_STYLE and the correct setting, possibly WS\_DLGFREAME. Don't know for X11.

2- If i can remove the title bar from a window

- 1 - yes (look for Paint method, see in examples)

2 - yes (any popup window - without titleBar)

---
