Subject: How to remove a column from ArrayCtrl?
Posted by JoseB on Sat, 25 Apr 2009 14:11:03 GMT

Hi,

Is there any way to remove all or a specific (added) column from ArrayCtrl?

Thanks you

JoseB

You can remove all columns with Reset.

If you need to remove just one, you have to Reset and recreate.

You can also hide column using HeaderTab(...).Hide().

Note that removing column is not that easy given the model as there is loose relation between columns and row indicies.
