Sure!

I need to have the total number of rows in my db, so, i need to count the total lines inserted. There is a way to have that number?

```
int n = SQL % Select(SqlCountRows()).From(MYTABLE);
```

[http://www.ultimatepp.org/src\\$Sql\\$SqlExp\\$en-us.html](http://www.ultimatepp.org/srcSqlSqlExp$en-us.html)

But of course, SQL knowledge is expected...

I know SQL, I don't know when to use
SQL %
SQL *
SQL * ::

what are the difference between this syntax?
