
Subject: DropGrid problem in 1254?

I have a DropGrid that's pretty simple... It's defined in the associated Layout w/all default options.
In code I:

```
apiary.AddPlus(THISBACK1(NewApiary, &apiary));  
apiary.WhenAction = THISBACK(OnChangeApiary);
```

```
// Later in code, I populate it:
```

```
apiary.Clear();  
apiary.Add(0, "All");
```

```
SQL & Select(ID.Of(APIARY), NAME.Of(APIARY))  
    .From(APIARY)  
    .OrderBy(NAME.Of(APIARY));
```

```
while(SQL.Fetch())  
    apiary.Add(SQL[0], SQL[1]);
```

```
// Later in code:
```

```
void BeekPRO::OnChangeApiary()  
{  
    LoadHives(apiary.GetData());  
}
```

```
void BeekPRO::LoadHives(Value apiaryId)  
{  
    hives.Clear();  
  
    if (apiaryId == 0)  
        SQL & Select(ID, APIARY_ID, NAME, HIVE_TYPE_ID)  
            .From(HIVE)  
            .OrderBy(NAME);  
    else  
        SQL & Select(ID, APIARY_ID, NAME, HIVE_TYPE_ID)  
            .From(HIVE)  
            .Where(APIARY_ID == apiaryId)  
            .OrderBy(NAME);  
  
    while(SQL.Fetch())  
        hives.Add(SQL);  
}
```

That's all the code related to this drop grid. The problem I am having is when I change the selection of the drop grid, the hives grid is reloaded properly however the display of the newly selected apiary is blank. If I simply move my mouse over the control the control then changes from blank to the apiary name.

If I simply load U++ 2008.1 and compile the program, I do not have this problem. Everything runs find and updates instantly. When I then load it in 1254, recompile the bug exists. Load in 2008.1, recompile everything works great.

I've tried to reproduce this in a small test case but have failed.

Has anyone else experienced this?

Jeremy

Please get latest sources from svn. I reverted removing SetFoucs from DropGrid. Now everything should work as before. Sorry for troubles.

Yes, this works now. Thanks and no problem, we're developers we write bugs once or twice in our career

Jeremy
