What is new in version 1314:

Library:
CtrlCore:
Fixed several X11/Compiz/SCIM compatibility issues

RichText:
QTF: Added text-type rich object format

GridCtrl:
Added WhenMoveRow, CancelMove
Improved search results highlighting

theide:
Import directory source tree into package
Support for multiline svn commit messages
Assist++ now supports SQL schema files
FileTabs now persistent
Non-fixed pitch fonts allowed in editor (used as fixed...)

Still seems to say 1154.

Jeremy

IIRC the upp site is synced at midnight, so you have to wait for this update.

Actually, process starts at 2:00 am (central european time).

Mirek
You'll have to wait until tomorrow

Wow, I keep forgetting about that delay. Opps.

BTW... I like the idea of releasing often.

Jeremy

Well, it is true that such delay is confusing, I will think about it.

Obviously, the simplest thing to do is to delay the annoucments over night (after updated website).

Mirek
