Hi all,

I wished to move from 2008.1 UPP version to the new release 1254. All my projects were compiled with no error except the ones based on the use of MySql interface. I got the following error message :

```
----- CtrlLib ( GUI MT GCC DEBUG DEBUG_FULL BLITZ WIN32 ) (1 / 11)
----- MySql ( GUI MT GCC DEBUG DEBUG_FULL BLITZ WIN32 ) (2 / 11)
MySql.cpp
----- CtrlCore ( GUI MT GCC DEBUG DEBUG_FULL BLITZ WIN32 ) (3 / 11)
----- RichText ( GUI MT GCC DEBUG DEBUG_FULL BLITZ WIN32 ) (4 / 11)

----- papyrus ( GUI MT MAIN GCC DEBUG DEBUG_FULL BLITZ WIN32 ) (11 / 11)

```

There were errors. (0:20.54)

I use MingW compiler and all paths to MySql Bin/include and lib files have been configured in the build window.

Does anyone has an idea of what happened ?

Thank you in advance

Sincerely

Maybe some new incompatibility MYSQL/MINGW.

Download and install Vista SDK (works for XP too). Saves a lot of troubles like this one.

Thank you Mirek for your reply.

Sorry to give up MingW but I will try to move to MS SDK and will inform if all is ok with MySql.
