Hi to all,
I don't know if that was already proposed, but it's nice for me to have a function that highlight (terrible word for an italian, better to write ailait) all the occurrences of a selected word. Below there is a small example from notepad++

The last "one" is what I selected.

Thanks for your very good work. I appreciate it very much.

Rick

I agree with Rick, highlighting for selected words it's very useful! I must enable this functionality or isn't implemented yet?
thanks!

Sam
