Subject: SqlCtrl, TctrlLib - empty Doctypes dependancy [BUG?]

I'm trying to use SqlCtrl and i found that includes TCtrlLib which creates an empty Doctypes dependency.
Is it normal? i tried to fix this by removing Doctypes.h as a dep, but found some missing clases, like DocReport in SqlConsole.cpp.

Since i'm very new to upp i don't know what to do next. Is it a bug in TCtrlLib?

thanks in advance.

A bug, thanks & sorry... (will be repaired in next dev release).

For now, fix it by removing reference to the TCtrlLib. Actually, TCtrlLib will be gone soon as well (important parts moved to CtrlLib).
