Hello Mirek,

It is not so important... but the StatusBar::StatusBar() method has redundant code. Property frame.style is set double with same value.

Here is the original code:

```
StatusBar::StatusBar()
{
    Height(5 + max(16, Draw::GetStdFontCy()));
    frame.style = frame.style = &StyleDefault();
    SetFrame(frame);
    AddFrame(grip);
}
```

And I think must be:

```
StatusBar::StatusBar()
{
    Height(5 + max(16, Draw::GetStdFontCy()));
    frame.style = &StyleDefault();
    SetFrame(frame);
    AddFrame(grip);
}
```
