Subject: Postgresql - execpt vs minus

Hi,

Postgresql uses "except" not "minus", so SqlSet operator- and SqlSelect::operator-= should be modified:

```
SqlSelect& SqlSelect::operator-=(const SqlSelect& s2) {
 text << SqlCase(PGSQL," except (")(" minus (") << s2.text << ')';
 return *this;
}

SqlSet operator-(const SqlSet& s1, const SqlSet& s2) {
 if(s1.IsEmpty() || s2.IsEmpty())
  return s1;
 return SqlSet(s1() + SqlCase(MSSQL|PGSQL, " except ")(" minus ") + s2(), SqlSet::SETOP);
}
```
