Hello Everybody!

I have been around here for sometime but I will like to announce to everyone that I will be using Utimate++ framework in teaching programme this year and hence forth.

I teach programming across levels ranging from A' level, BTEC Nationals, HNC, HND and the Foundation Degree. My Students will be using, adopting Utimate++ in many programming areas from console to gui, database, sql, schema, event driven and even game programming. I will also be invsetigating how Utimate++ could be used to extend existing C libraries that need C++ extensions (e.g. like the brilliant Ecere SDK --> http://ecere.com, graphApp, etc..).

Many of my students will be registering on this forum as from tomorrow. Kindly give your support for any question raised by the students. They will also be uploading their work as well so I will tell them to keep them under this tread (of course with the permission of the administrator).

I will like to thank everybody in advance for the tremedious work, efforts and achievements that has gone into this framework over years. Keep the good work!

God blesses!!!

Best regards,
Sanyaade

That sounds good!
I wish I could join.

Good to hear...
This will not only be useful to students, but also to u++.
Thanks for promoting U++ by teaching.
We are happy to help you.

Greetings,
L.Rishikeshan
