I have many update to do in an arrayctrl, I want to stop update and do a general refresh when I wrote all in the cells. Is possible?

Sam

Not yet.

Actually, I was thinking about this feature very recently:

I have application with about 500000 records in ArrayCtrl. Adding all these lines was quite slow.

Anyway, in the end, I have ended with even more effective solution - RowNumColumns and virtual count....
