I get the following in 603-dev3 and i can't find a suitable definition of WriteFile anywhere in the sources, sorry =(

/home/santiago/upp/uppsrc/Core/Log.cpp: In member function ‘void LogStream::Create(const char*, bool)’:

1 file(s) compiled in (0:02.47) 2472 msec/file

This is a Win32 function. I suppose you are using Linux. It is a bug that it was left in: you can fix the bug for yourself by changing the
WriteFile(hfile, h, strlen(h), &n, NULL);
line to
write(hfile, h, strlen(h));
And do the same modification for the two other bug locations in the same method.
