Hi All,

Will there be a Traylcon interface for linux too? I just created a simple sticky notes application using up in windows. Then I tried to compile it under linux but i got an error saying that there is no class def called Traylcon.

Thanks

I hope yes, there will be... Of course, community contribution here is welcome

I have found one trayicon example using gtkmm but without configure files. Anyhow, I added them and uploaded below.

By using gtkmm lib, it should work both on Linux and WinXP

3togo
