Hello,

in my old code compiled with version 2008.1 I used the function
CreateImageObject()

It appeared in a line like this:

```
QtRichObject pict2( CreateImageObject(StreamRaster::LoadFileAny(fhost), 400, 300) );
```

Today I compiled it with the version 1517 and MSC9 and the function is disappeared.
Is there some other substitute of such method?

Thank you,
Luigi

I believe CreatePNGObject or CreateRawImageObject would work just the same.

```
QtRichObject pict2( CreatePNGObject(StreamRaster::LoadFileAny(fhost), 400, 300) );
```

```
QtRichObject pict2( CreateRawImageObject(LoadFile(fhost), 400, 300) );
```
