Hi,
Does Upp has any support for sending emails? If so, please could you telme with class does it or how do i do it?

Many thanks

Alex

Thank you.

Please, how do i make the authentication on the mail server, to send login and password?

I see that there is a class WebUser but how to i "link" this class to the Smtplib class to do authentication at email server?

I have this code, but does nothing.

```
Smtplib mail;  
mail.Host("smtp.gmail.com");  
mail.Port(587);  
  
mail.To("alex@gmail.com");  
mail.From("alex@gmail.com");  
mail.Subject("Upp email test");  
mail.Text("This is an email sent from an upp app");  
  
mail.Send();  
  
PromptOK("Email Done!");
```

Thanks a lot

Alex

Hi,

perhaps this post

http://www.ultimatepp.org/forum/index.php?t=msg&&th=1529&goto=5785#msg_5785
may help.

Luigi

smtpEx.zip is empty...
O got it from other location...

I would like to use gmail server.
It seems that it uses SSL. So, the smtpEx class doesnt handle SSL, right?

Thanks a lot

Alex

Alex

No, it doesn't use SSL. If you need smtpEx let me know.

Thanks Luigi

I downloaded it with success from other location on the Internet. Now i cant remember its address.

What i need is a way to connect to google mail server... IT uses SSL...

I will try to see if there is any windows free dll that dop that and then i will try to use it from the upp application.

Thanks a lot

Alex
