ubuntu, gcc. upp-x11-src-1447
debug mode: success.
optimal mode: crashing.

code snippet FileSel dialog;
 dialog.ExecuteSaveAs();
what's wrong?

Hi, i don't have upp-x11-src-1447 but with 1680 version it doesn't crash. Are you sure that the problem is not in ezcommon lib?
Btw, you project file sent with this package still have the names of files which you didn't included and theIDE is trying to link with ezcommon which doesn't exist. Anyway, after cleaning the package as i said the crash doesn't occur.

Andrei

most recent discovery,
filesel.cpp:line 390 crashes. if i change it to return basedir, it works. i don't know why "String s = ~dir;"

i've tried 1680, too. it still fails. now i've trimmed irrelavent files.
chinese xp: runs well.
english xp: no crashes. (program built on chinese xp, using MSC.)

chinese ubuntu: memory failure when building optimal; no crashes when built to debugging. (built on ubuntu, using GCC.)
i've included the two errors' photos in the zip file.

Hi, i've installed simple Chinese and so far no crash here. I'm getting your program running without any problem.
Is there a reason why you didn't called CtrlLayout(*this) in window constructor?
I think it's not related to crash. Anyway, no crash so far.

do i have to call CtrlLayout(*this)? it doesn't help, since the ezcommwin part does not affect FileSel's failure.
suppose you are running on linux.
