Hello All,

Method TrayIcon::Info do not show message for Linux.

For win32 work fine!

I have Ubuntu 9.10

Can anybody help me?

Found an interesting discussion about notify in xlib. but for me it is not sufficient to develop or correct notify message!

Maybe for somebody this discussion will be util!

I only Had posted some ideas about notify message!

If For anybody the TrayIcon::Info method is working in linux, please tell me.

With respect, Ion Lupascu.

Hi, I have a patch for it but it's gtk+ only. You have to install libnotify-dev for this to work. Be aware that this patch CtrlLib.upp also(to include libnotify for links).

L.E.: Patch removed, now implemented in TrayIcon

This patch show application icon in notification.
It use fuchsia color for achieving transparency, so no fuchsia in icon. With little changes it may be made to show icon based on context(Info, Warning, Alert).

L.E.: Patch removed. We don't need custom icons, Info, Warning and Alert are enough.

Thank you Andrei,

I have installed libnotify!

I will try your patch!

Good work Andrei!

It works fine! Thank you!
At Evening I will upload new Google translator version with new future from google and me.
Some new futures are:
1. Now shortcut [Ctrl]+[C]+[C] works in linux(ubuntu) too (thanks to Mirek).
2. With your help GoogleTranslatorDemo will translate in notify window.
3. Add new languages for translate (total 80 languagies)
4. Translit method (non latin chars will write in latin chars).
6. User name and password for proxy.

ADD:
I forgot to add:
I use ubuntu 9.10 with gnome.
Adrei's patch works fine!

Good work.

I think I will add this patch to U++, at least for now (but it too needs to adjust .deb packages...

However, I still believe that the trayicon protocol should be able doing that:

http://standards.freedesktop.org/systemtray-spec/systemtray- spec-0.2.html#balloon

Maybe somebody could invest time to investigate.

On related topic, Tip does not work well too. Frankly, there is something weird about trayicons... something related to focus and/or activation and/or z-order. Hopefully I will find time and energy to find out.

Mirek
