Subject: Error "out of operations limit - considered frozen"

Hello all

I have got this error: "out of operations limit - considered frozen" when debugging Ctrls in layout editor.

After some hours I think I am surpassing some kind of limit in Esc (like an Stack Overflow, but in Esc), so that if I simplify enough the Esc program (in this case, a rather complex Ctrl) I does not get this error.

Does anybody have any idea ?

Best regards
Koldo
