Subject: UPP app -> Ext EXE (send email) wrong charset
Posted by alex100 on Tue, 01 Dec 2009 11:49:22 GMT

I all

I have a upp app that is using an external exe to send email via google.
I am launching the external exe as follows:

ShellExecute(NULL, "open", "GmailSend.exe", "user1@gmail.com Teste Ola", ".",
SW_SHOWDEFAULT);

(it is the email, subject and body)

The email is successfully sent but charset is not correct.

I have source code of the external exe and I see that subject and body are formated using utf8. If I
send the mail from windows command line everything is fine but using the upp app
the charset is not correct.

On upp app i put this:

SetDefaultCharset(CHARSET_UTF8);

But it continues to have wrong charset on final email.

How to solve this?

Many thanks

Alex

Hello Alex100

Charset always make me sweat, but try with this:

ShellExecuteW(NULL, L"open", L"GmailSend.exe", ToCharset(CHARSET_UTF8,
"user1@gmail.com Teste Ola"), L".", SW_SHOWDEFAULT);

Perhaps this also works (after SetDefaultCharset(CHARSET_UTF8);):

ShellExecuteW(NULL, L"open", L"GmailSend.exe", WString("user1@gmail.com Teste Ola"), L".",
SW_SHOWDEFAULT);

Best regards
Koldo
