Sorry, but...

How,

edit.GetText() to double

Thanks!

Hello exdatis

It is not difficult. You can use:

atof(edit.GetData().ToString());

Best regards

Koldo

double StrDbl(const char* s)

is the U++ way.

Thanks,

easy!

p.s. StrDbl(const char* s) it's work

easy!

p.s. StrDbl(const char* s) it's work

Be aware that if s does not represent double (e.g. is empty), StrDbl returns Null (which is represented by very high negative number and can be tested for using IsNull).
