Hi all!

Is it possible to add a HeaderCtrl to DocEdit?

I can do it with:

```
DocEdit1.Add(HeaderCtrl1.TopPos(0).HSizePos());
```

But then the Caret of DocEdit appears over the HeaderCtrl. What to do?

Thanks in advance,

WebChaot.

Sorry! Found solution by myself.

```
DocEdit1.AddFrame(HeaderCtrl1);
```

I thought, I tried this before my post here in forum.
