What is new in version 1824:

Core:
* XmlRpc package adds support for XML-RPC based webservices.
* LanguageInfo in Core has been completely refactored.

TheIDE:
* Autosetup now recognizes Win32 SDK 7.0.

Bazaar:
* GoogleTranslator: New version.
* Functions4U: New package with additional functions to complement Core and CtrlLib.
* Controls4U: New package with additional graphic controls.
* SysInfo: Improved Unicode support.

Nice!

Together we do more!

Koldo, for you, username and password for proxy address in GoogleTranslator works?

Hello Ion

Quote:Koldo, for you, username and password for proxy address in GoogleTranslator works?

No . I am convinced that my proxy is unusual in any way. I have to ask about it.

Best regards
Koldo
