how programatically change widths/heights of splitted controls, if I have e.g

...

```
horz.Add(tree);  
horz.Add(array);  
horz.Add(editor);
```

```
Add(horz.Horz().VSizePos(35,35));
```

...

Splitter::SetPos

However, note that argument should 0..10000, expressing the portion of maximum size.

Thanks Mirek.

Stupid me! Position is not width!

```
horz.SetPos(2000,0);  
horz.SetPos(3000,1); //was 2000...
```
