Simple INI parser

Test-log:

15 mb random INI-file

START LOADING at 01/18/2010 14:59:33

::MemoryUsedKb() = 536

COMPLETE LOADING at 01/18/2010 14:59:37

::MemoryUsedKb() = 94292

COMPLETE_SAVING at 01/18/2010 14:59:39

I hope it can be useful somehow. Example included.

IniFile 1.0 - Simple INI parser

Example of ini-file:

```
[Test]
```

```
Title = "Test \"Title\""
```

```
Name1 = "Value 1"
```

```
"Name 2" = Value2
```

```
Number = 1
```

```
Characters = \\\"[\\],\| =
```

```
"Name with \\\"[\\],\| = " = Value
```

```
["Section with \\\"[\\],\| ="]
```

```
Name = Value
```

Example of usage:

```
IniFile p;
```

```
p.Add("Test", "Name1", "Value 1");
```

```
p.Add("Test", "Name 2", "Value2");
p.AddInt("Test", "Number", 1);

p.Add("Test", "Characters", "\\\"[],=");
p.Add("Test", "Name with \\\"[],=", "Value");
p.Add("Section with \\\"[],=", "Name", "Value");

DUMP(p.Get("Test", "Name1")); // "Value 1" as result
DUMP(p.GetInt("Test", "Number")); // 1 as result
DUMP(p.Get("Test", "Characters")); // \"[],= as result

LOG(p.Dump());
p.Save(ConfigFile("Test1.ini", CHARSET_CP1251));
p.Clear();

p.Load(ConfigFile("Test1.ini", CHARSET_CP1251));
p.Save(ConfigFile("Test2.ini")); // CHARSET_DEFAULT
```

Version 1.0:

- * bugfixes (most of them)
- + charsets support (Load("file...", CHARSET_CP1251) and Save)
- + added \ support to use the chars [],=,\

Best regards!

hmm, bug with ','

trying to fix...

if somebody has an idea about reasons, help me. I'm a little slow today =)

Sc0rch wrote on Mon, 25 January 2010 16:03hmm, bug with ','

Not only with ',' found. Fixed.

Quick fix:

```

String GetText()
{
if (Text.GetCount() == 1 && Text[0] == '\')
return "";
else if (Text.GetCount())
{
String t = Text;

if (Text[0] == '\' && Text[Text.GetCount() - 1] == '\')
t = Text.Mid(1, Text.GetCount()-2);

if (t.Find("\\\\") >= 0) ::ReplaceString(t, "\\\"", "\"");
if (t.Find("\\[" ) >= 0) ::ReplaceString(t, "\\[", "[");
if (t.Find("\\]" ) >= 0) ::ReplaceString(t, "\\]", "]");
if (t.Find("\\=" ) >= 0) ::ReplaceString(t, "\\=", "=");
if (t.Find("\\," ) >= 0) ::ReplaceString(t, "\\,", ",");
if (t.Find("\\\\") >= 0) ::ReplaceString(t, "\\\"", "\"");
return t;
}
return Text;
}

```

New version of IniParser:

c:\upp\uppsrc\core\Topt.h(137) : error C2558: struct 'IniName' : no copy constructor available or copy constructor is declared 'explicit'

c:\upp\uppsrc\core\Vcont.h(45) : see reference to function template instantiation 'T &Upp::DeepCopyConstruct<T>(void *,const T &)' being compiled

with

```

[
T=IniName
]

```

c:\upp\uppsrc\core\Vcont.h(45) : while compiling class template member function 'IniName &Upp::Vector<T>::Add(const T &)'

with

```

[
T=IniName
]

```

```
c:\myapps\iniconfig\IniConfig.h(186) : see reference to class template instantiation
'Upp::Vector<T>' being compiled
with
[
  T=IniName
]
```

I get these messages when compiled with MSVC10.
No problem with mingw,
Same messages for IniSection.

How to fix this issue ?

Thank you.
