Subject: Creating legacy OCX with UPP

Hi everyone,
I was wondering whether it is possible to compile the OcxCalc example, but using in Custom Compile section:
/oldtlb /no_stamp,

instead of
/newtlb

(for making it compatible with legacy systems)
This results in an error:
midl\oleaut32.dll : error MIDL2020 : error generating type library : AddImplType failed : Calculator (0x80028029)

Anyone has any idea how to solve this problem?

Thank you,
Epichorns
