Hi everyone,

I was wondering whether it is possible to compile the OcxCalc example, but using in Custom Compile section:

/oldtlb /no_stamp,

instead of

/newtlb

(for making it compatible with legacy systems)

This results in an error:

mid\oleaut32.dll : error MIDL2020 : error generating type library : AddImplType failed : Calculator (0x80028029)

Anyone has any idea how to solve this problem?

Thank you,
Epichorns
