So it should be 21:00 UTC. Anybody in the room or am I having problems again with IRC? Nothing except the web client can locate the server and the room is called "#u" not "u++" and I'm the only one there.

Could someone post step by step instructions that work for them? Logging in to IRC is harder than using C++ ).

Which client are you using?

Well using slashNET "http://www.slashnet.org/webclient/u++" I got "(User has been banned from SlashNET (Exceeding session limit))" because I was logged on about 5 times at the same time with different users and all I can see is me.

With mIRC I get "* Connect retry #23 irc (6667) * Unable to resolve server" on irc://slashnet/u++.

Try changing user name, session is free so this should work

try in mIRC to connect to server
"irc.slashnet.org" (default 6667 port)

If it succeed, find some "join channel" command, and use #u++ (maybe u++ without # will be enough in mIRC)

Hello all

Finally I could not being in the meeting but thanks to dolik.rce I have enjoyed the meeting log:
- 6 hours
- 29 sheets log to read in more than 1 hour
- more than 900 comments
- 11 attendees

Definitely people have chosen the format of the meetings to be a chat of topics that most interest.

In this meeting the most important topic has been probably PR.

I think that this is a good experience. Perhaps there is people that cannot attend in that time and could arrange a meeting at other time.

Why not ?

Best regards
Koldo

Why not ?

We should still distinguish. I think there is nothing bad about IRC chat anytime you wish.

But scheduled one with reasonable period has slight advantage that it makes at least me to

1) gather the most pressing issue I can do till the next meeting
2) actually do it

BTW, not sure what happened in the next 3 hours, I guess most people left after 2.5...

Mirek
