Subject: .deb libnotify-dev warning!

Hi,

as I have accepted TrayIcon patch that requires libnotify, it should be now added to .deb requirements.

I have done so for infrastructure server, at least I hope. Please report any problems with next automated deb64 release.

Mirek

Hi Mirek,
Thanks for warning, it probably saves me few hours of investigation why the buildscripts doesn't work all of a sudden

Mirek,

Please apply this patch for correct compile in win32!
Problem Description: you had include glib.h and libnotify/notify.h for win 32 too!
