What is new in version 1952:

TheIDE:
* Improved installation in Win32 with support for the latest Win32 SDK.
* Helpsystem has vastly improved searching capabilities.
* Build process now supports new link options - Posix releases now use "gc-sections" linker option to dramatically reduce the size of resulting binaries (up to 40%).

CtrlLib:
* File selector (FileSel class) got networking support in Win32.
* TrayIcon in X11 now supports notifications.
* TopWindow in X11 now supports SetAlphs.

Painter:
* Image rescaling algorithm was improved for better downscaling.

Core:
* Containers now have a new debugging utility to resolve pick semantic errors.

Download it in http://code.google.com/p/upp-mirror/downloads/list

Hello All.
I can do and upload deb i386 release.

Regards, Ion Lupascu (tojocky)

HELP!!! I've updated to SVN 1952 and can't compile my application (Ubuntu linux 9.10)

TrayIconX11.cpp
/home/serg/upp/uppsrc/CtrlLib/TrayIconX11.cpp:9:31: error: libnotify/notify.h: No such file.

scope

this scope

I downloaded from the site upp-x11-src-1952.tar.gz. When compiling stops at the same error!
I have to drop to SVN 1924 - then everything works.

You have to install libnotify-dev. It was introduced as dependency for TrayIcon notifications,

Yes!!!

Solved!!!

All compiled!
