Hello all

There is a compiling problem in Win32DnD.cpp using MinGW because POINTL has not a ToString().

The solution is:

- Line 158

Change this:

```
LLOG("DragEnter " << pt);
```

with this:

```
LLOG("DragEnter " << AsString(pt));
```

- Line 181

Change this:

```
LLOG("DragOver " << pt << " keys: " << grfKeyState);
```

with this:

```
LLOG("DragOver " << AsString(pt) << " keys: " << grfKeyState);
```

```

- Line 181

Change this:

```
LLOG("DragOver " << pt << " keys: " << grfKeyState);
```

with this:

```
LLOG("DragOver " << AsString(pt) << " keys: " << grfKeyState);
```

Ops. LLOG should not be active in the first place...
