Subject: Bigger images/icons in menu
Posted by mdelfede on Wed, 03 Feb 2010 13:11:45 GMT

Hi,

I'd like to have a submenu with images and optional text, with submenus too.
Using default menu structures gives very small images; I need bigger ones, and maybe taylor text placement, or suppress it completely. Is it possible to do it ?

Ciao

Max

Well, I found MaxIconSize() that allows to put a bigger image inside a menu item... but the text looks ugly on image right and vertically centered.
Is there a way to fine-tune text placement, maybe superposed to image ?

Ciao

Max

Can you send me a simple testcase?
