Hello all

In some posts today active like these (http://www.ultimatepp.org/forum/index.php?t=msg&goto=249 31&#msg_24931 http://www.ultimatepp.org/forum/index.php?t=msg&goto=249 27&#msg_24927) is commented that some controls are not available in the layout designer.

In my opinion all controls should be there.

Please if anybody has programmed a visual control only available by programming and not by layout designer, and do not have time or skills to get it there, I can help him/her.

Just tell me what is the control class and I will prepare the code to have at least a basic access from layout designer.

Layout designer is a great visual tool, and we can make it greater by putting all visual controls available there.
