What is new in version 2070:

TheIDE:

- * User interface for Find and Replace was significantly reworked
- * Current editor line is now highlighted in the left bar.

Core:

- * Support for Win32 .lnk files (GetSymLinkPath function, FindFile::IsSymLink method) - same interface as for Posix symlinks.
- * ConvertDate has new Truncate option (truncates Time to Date), corresponding StdConvertDateTruncate global Convert added.

CtrlLib:

- * SliderCtrl widget, has new Jump method.
- * ArrayCtrl class has new WhenMouseMove Callback.
- * EditField has new WhenEnter callback.
- * TabCtrl has new NoAccept option

Draw:

- * The search for missing glyphs (i18n issue) was optimized.

Download it in <http://code.google.com/p/upp-mirror/downloads/list>

Hi,

For some reason, the upp-win32-2070.exe installer (downloaded from <http://code.google.com/p/upp-mirror/downloads/list>) refuses to even start on my computer. No messages are given. (OS: Windows 7 Professional x64).

The same file on sourceforge.net is short and broken.

Best regards,

Tom

UPDATE: The file upp-win32-2081.exe does not run either. The last time I updated was upp-win32-1952.exe and that installer still works.

Hello Tom1

You are right.

While getting the right installer upp-win32-2070.exe in SF has been removed.

Issue fixed. I have restarted the build process.

I apologize for inconvenience, maybe it should rather be "U++ 2083 released"...

Mirek

Thanks Mirek,

It works OK now.

Best regards,

Tom
