Google displays results for "C++ cross platform" - Ultimate++ - 3 rd place!

I have never watched the position in the search. Nobody will tell how it was before?

Of course this can change a lot, but for me we are 5th.

2th. Cross-platform - Wikipedia, the free encyclopedia
4th. Fast Light Toolkit (FLTK)
5th. Ultimate++
6th. Qt - A cross-platform application and UI framework
7th. wxWidgets

No No No!!!

In the Russian search engines are all bad!

And on the forums people are actively looking for a cross-platform environment C++
