I use UPP 2018 under ubuntu 9.10 (last 32 bit .deb available on source force)

Doing a rebuild all operation on a sample project and wanting to navigate in the menu during this time is impossible because the menus close themselves every second or so until the build operation is over.

Not checked on windows

thanks

I checked on Windows (win7 32bits) and there it is ok, the menu work as expected during a build operation

Hi, i don't know how's that possible I have Win7 64 bit and the menu is closing during build operations as in Linux. Btw, this is a known behavior and maybe a bug .

Andrei
