Subject: Problem with script translation
Posted by Sc0rch on Sat, 20 Feb 2010 19:27:21 GMT

Hello all!

When I call something like that (Russian text in parameters):

I get as result something like: 1058, 1077, 1089, 1090. And etc.
What does it mean? Is there way to get Russian?

Best regards,
Anton.
