
Subject: Loss of digits in double Xmlize

Hello all

Now double type Xmlize only stores 10 digits:

```
(From Xmlize.cpp)
template<> String XmlAttrStore(const double& var)
{
    return AsString(var);
}
```

To avoid it AsString() would have to be substituted with something equivalent to:

```
FormatDoubleDigits(var, DBL_DIGITS - 2);
```

A VERY good observation, thanks! Applying the patch now.
