Hello all

Now double type Xmlize only stores 10 digits:

(From Xmlize.cpp)

```
template<> String XmlAttrStore(const double& var)
{
    returnAsString(var);
}
```

To avoid it AsString() would have to be substituted with something equivalent to:

FormatDoubleDigits(var, DBL\_DIGITS - 2);

A VERY good observation, thanks! Applying the patch now.

Mirek
