Hi there,

what about having Desktop and home (MyFiles) folder shortcuts in the FileSel dialog? recently, Network support was added, but this one is also almost a must (to the Windows slaves at least)

is that possible?

is that possible?

Defintely. It's on my list, it is not even so much hard to implement, just cannot get to it...

Remind me on Friday

Mirek

Hi Mirek,

Thank you! It's beautiful, but I noticed on Linux that the 'Network' leads to nothing. At least on my Kubuntu. Maybe 'Network' could be hidden in non-windows environments?

Hello Mirek

In FileSel.cpp, function bool FileSel::Execute(int _mode), perhaps:

dir.Add(GetHomeDirFile("Desktop"));

would have to be substituted with:

dir.Add(GetDesktopFolder("Desktop"));

as not always Desktop folder is called "Desktop" as it is translated.

Hello Mirek

Some layout fixes. Translated into Spanish some texts with red arrow are truncated.

Hi,

This is not a critical issue, but in my opinion the FileSel dialog would look better if the places panel would:

1. use title 'Videos' instead of 'Video'
2. have the elevator hide automatically when not needed.

Sorry,

By 'elevator' I actually mean VScrollBar. (You see the resemblance of the two...)

Hi Mirek,

Thanks, it's much better now. How about adding:

places.AutoHideSb();

near the end of the FileSel::FileSel()? (You know, to automatically hide the 'elevator' thing)
