Valgrind changes have broken theide support for it.

Adding this in valgrind.cpp :

```
if(txt.Find("--xml-file=") > 0)
    ValgrindLogFile = "--xml-file=";
else if(txt.Find("--log-file-exactly") > 0)
    ValgrindLogFile = "--log-file-exactly=";
else
    ValgrindLogFile = "--log-file=";
```

instead of

```
if(txt.Find("--log-file-exactly") > 0)
    ValgrindLogFile = "--log-file-exactly=";
else
    ValgrindLogFile = "--log-file=";
```

Allows valgrind to run, but then theide hangs on valgrind result parsing.
I'm not good enough to debug it....

Ciao

Max
