Subject: Format(Time time, bool seconds) problem

Hello all

Now Format(Time) removes hour and minute when hour == minute == second == 0.

This affects too to EditTime control.

Would it be possible to remove this behavior or at least to add some parameter to avoid it ?

I am forced to have full date and time all the day.

```
String Format(Time time, bool seconds) {
 if(IsNull(time)) return String();
 String s = Format(Date(time));
 if(time.hour == 0 && time.minute == 0 && time.second == 0)
  return s;
 else
  return s + (seconds ? Format(" %02d:%02d:%02d", time.hour, time.minute, time.second)
                      : Format(" %02d:%02d", time.hour, time.minute));
}
```

Thank you

OK. I hope this will cause any problems. But seems logical to me.

Hello Mirek

I would need an option to always display the full date and time.

If you do not want to change the code of Format(Time time, bool seconds), could you add a kind of .Pattern() function not just for EditDouble and so functions, but for EditTime ?

Ah, I might not have been quite specific. I have changed the code as requested

BTW, there are some settings for EditTime anyway. EditTime (as all Value specific Edits) inherits ConvertTime, so all ConvertTime methods are available.
