Hello all

Now Format(Time) removes hour and minute when hour == minute == second == 0.

This affects too to EditTime control.

Would it be possible to remove this behavior or at least to add some parameter to avoid it ?

I am forced to have full date and time all the day.

```
String Format(Time time, bool seconds) {  
    if(IsNull(time)) return String();  
    String s = Format(Date(time));  
    if(time.hour == 0 && time.minute == 0 && time.second == 0)  
        return s;  
    else  
        return s + (seconds ? Format(" %02d:%02d:%02d", time.hour, time.minute, time.second)  
                        : Format(" %02d:%02d", time.hour, time.minute));  
}
```

Thank you

OK. I hope this will cause any problems. But seems logical to me.

Hello Mirek

I would need an option to always display the full date and time.

If you do not want to change the code of `Format(Time time, bool seconds)`, could you add a kind of `.Pattern()` function not just for `EditDouble` and so functions, but for `EditTime` ?

If you do not want to change the code of `Format(Time time, bool seconds)`, could you add a kind of `.Pattern()` function not just for `EditDouble` and so functions, but for `EditTime` ?

Ah, I might not have been quite specific. I have changed the code as requested

BTW, there are some settings for `EditTime` anyway. `EditTime` (as all Value specific Edits) inherits `ConvertTime`, so all `ConvertTime` methods are available.
