Hi,

I need to input time of day only and the DateTimeCtrl control does not allow time only input.

I tried to use Clock but I don't know how to use PopUpCtrl's

And when I use the the EditTime, you also have to input the date !

What is the wright way to input time of day ??

I also tried to enhance the DateTimeCtrl control to add TIME_ONLY option but I'm not sure this is correct since the 'Time' type stores time and date .

Can someone help ?

There is a DropTime control which should show clock only

Hi,
There is a DropTime control which should show clock only
I already tried, it was practically the first thing I did, but the name is misleading, it should be named DropDateTime since you have time AND date

Yes, you're right. I'll try to change it.

I tried to use Clock but I don't know how to use PopUpCtrl's

And when I use the the EditTime, you also have to input the date !

You can create Convert for time-only, should be simple. The one minor problem is there is no 'DayTime' type in U++ now, but maybe you can use just int and represent value as number of second since midnight.

Thanks for you're replies

But I can't believe I'm the first one that runs into this ?

Actually, over the span of 10 years and about 35 bussiness oriented apps in U++, I never needed time of day. Usually it is just dates or sometimes date+time...
