Tabbed workspaces...? Because undogs mentioned this in Fold/Unfold topic I think it's more appropriate to have a separate topic. So, please discuss it here...

Thank you for starting the new topic

For all interested please see the screenshot attached in my response to gprentice message in fold/unfold topic.

Generally I would like to have for all the time fresh list of methods/variables on the screen.
I know that list of open files in some part duplicates quick tabs functionality. But I often have many files opened and very quick there is no space for new tab.. Column list control is very useful when comes to display many file names..
