Hello,

perhaps it is a bug (U++ 1824, MSVC9).

1) Compile UWord and open the attached qtf document.

2) on the left side there is a table with a red cell. Click it and try to let it to become white using the cell property button. After done the program crash.

Luigi

Hi Luigi, I've test this under XUBUNTU and all work right!

PS. UWord have been updated in one of last SVN. Update and recompile it. It has bug about toolbar.

Luigi

I believe this is venerable bug in UWord example. I actually crashes after clicking on most buttons.

Please try newer revision.

Luigi

I believe this is venerable bug in UWord example, fixed around rev 2000. I actually crashes after clicking on most buttons.

Please try newer revision.
