The debugger is not showing my array's values. (!) Surely this can not be good... Using v2232 on Vista64 with MSC9 Debug build method.

Can you have a look at this please?

Thanks,

Sandor

```
#include <Core/Core.h>
```

```
using namespace Upp;
```

```
CONSOLE_APP_MAIN
```

```
{  
    int a[3];  
    a[0] = 2;  
    a[1] = 3;  
    Cout() << a[0];  
}
```

Well, the last reply in the original thread was mine (asking for the testcase).

'Went into oblivion' was hidden "blame me" message, but maybe I should have been more clear. I definitely didn't want to blame you.

I can't recall why I abandoned that, probably some pressure of different projects, sorry anyway.

Well, I have reexamined the issue and I have to apologize, there is really blame on me: your patch was spot on! (actually, I have fixed the issue, then found your patch suggests the very same thing

Whatever, issue fixed.

Mirek
